sooner or later for people who've got to get up early in the morning. — For he's punctual, lasting, handsome and the best insurance against oversleep that I've ever heard of.

There's no guess work about him. — He calls you on the dot just when you say and either way you say — steadily for five minutes or intermittently for ten.

I have placed him in my window, take a look at him whenever you go by. — You can't miss him, he's on a pedestal in a class by himself.

### Minshall-Hansen Wedding.

Wednesday evening at the home of David Minshall, Miss Gertrude Minshall became the bride of Henry P. Hansen, Rev. Harman performing the ceremony in the presence of seventy-five relatives and more intimate friends. To the strains of Mendelssohn's wedding march rendered by Miss Helen Minshall, the bridal party entered the living room. First came the ribbon bearers Mildred Cressler and Gladys Johnson, followed by the groom and his best man, Charles Lierk; then the ring bearer, Marion Huxoll, and last the bride and her maid, Miss Hazel Minshall. The couple took position under an arch of green and gold hearts and smilax and ferns, where the ring service of the Lutheran church was used. The rooms were prettily decorated in green and gold hearts and cut flowers.

The bride was gowned in white silk crepe over white satin, trimmed with crystal pearls and Irish lace, wore a wreath and veil and carried white roses; the maid's gown was of yellow satin de luxe and she carried yellow chrysanthemums.

Following the ceremony congratulations were extended and a two-course buffet luncheon served.

The wedding presents, which were numerous and pretty, included a five hundred dollar check.

Mr. and Mrs. Hansen left the same night on a wedding trip that will include a visit in Chicago and at points in Wisconsin and Minnesota.

The bride was born in North Platte, spent all her life here, and has been justly popular in a large circle of friends. For the past two years she has conducted a dressmaking school in the Keith theatre building.

The groom was born and grew to manhood on his father's ranch northwest of town; was educated in the city schools and supplemented this with a course in an Omaha business college. He is a young man of sterling integrity and is held in high esteem by all acquaintances.

### Another Feature at The Crystal.

Last Monday The Crystal theatre began using the vaudeville attractions of the Sullivan & Considine circuit, which includes some of the best features on the road. The attractions this week have been very good and patrons have been highly pleased. Manager Westfall, however, desires to further add to the attractiveness of his play house, and to this end will, beginning next Monday, employ a four-piece orchestra, a feature that will be permanent.

### Ready to Arbitrate.

Word received in town yesterday by the strikers announced that the officials of the Illinois Central were ready and willing to submit the strike proposition to a board of arbitrators. The strikers will not, however, consent to this unless the Union Pacific and Southern Pacific make a similar offer. For the good of all it is hoped that the strike will be disposed of in this manner, and that, too, at the earliest possible moment.

### REAL DENTISTRY IS MODERN

Most of the improvements Have Been Brought About Within the Last Century.

In some of the ruins of Egypt are engravings representing a man lying on his back, while another standing over him pounding out a tooth with a rock. This is primitive dentistry, and while it might seem to be severe yet, no doubt, it brought a measure of relief, otherwise such extreme measures would not have been resorted to.

In China, it is said, when a man goes to the native dentist for relief from the toothache, it is the usual procedure for the dentist to insert his finger in the patient's mouth, and, on removing it, show him a worm which he says he has withdrawn from the tooth, and which, was causing the ache. This procedure, so we are told, usually stops the ache.

These primitive methods are a far cry from the scientific attitude of the profession today, yet most of the improvement has been brought about in the last one hundred years.

The causes of this rapid development have been many, the rapid growth of knowledge in other lines or work, the formation of dental colleges, the invention and manufacture of useful instruments, and the scientific study of the mouth and its diseases.

There is one other thing which has brought about this marvelous growth, which is perhaps more important than all the other causes, combined, and that is the professional spirit.

It used to be the thing, if a dentist made an improvement, to hide it from his brother dentist, so that he might reap the benefit alone. Many a secret, or invention, has died with the dentist originating it. In time this profession began to progress by leaps and bounds. Nowadays, if a dentist discovers anything new that is good, he carries it to his society and explains it to every one, so that all may get the benefit. He goes to the convention with one new idea and brings back a hundred, and both he and the people are benefited.
